Such contract shall require that the net revenues derived from the operation of the power plant herein appropriated for shall be used to reimburse the United States in the following order: First to liquidate the cost of the power development; second, to liquidate payment of the deferred obligation on the Camas Division; third, to liquidate construction cost on an equal per acre basis on each acre of irrigable land within the entire project; and, fourth, to liquidate operation and maintenance costs within the entire project. Provision shall also be contained therein requiring payment of operation and maintenance charges annually in advance of each irrigation season and prohibit the granting of a water right to or the use of water by any individual for more than one hundred and sixty acres of land irrigable under constructed works within the project after the Secretary of the Interior shall have issued public notice in accordance with the act of May 18, 1916 (Thirty-ninth Statutes at Large, pages 123–130); all lands, except lands owned by individual Indians, at the date of public notice in excess of one hundred and sixty acres not disposed of by bona fide sale within two years after said public notice shall be conveyed in fee to the United States free of encumbrance to again become a part of the public domain under contract between the United States and the individual owners at the appraised price fixed at the instance of the Secretary of the Interior, such amount to be credited in reduction of the construction charge against the land within the project retained by such owner. All lands so conveyed to the United States shall be subject to disposition by the Secretary of the Interior in farm units at the appraised price, to which shall be added such amount as may be necessary to cover any accruals against the land and other costs arising from conditions and requirements prescribed by said Secretary: *Provided further*, That trust patent Indian lands shall not be subject to the provisions of the law of any district created as herein provided for but shall, upon the issuance of fee patent therefor, be accorded the same rights and privileges and be subject to the same obligations as other lands within such district or districts: *Provided further*, That all construction, operation, and maintenance costs, except such construction costs on the Camas Division held and treated as a deferred obligation herein provided for, on this project shall be, and are hereby, made a first lien against all lands within the project, which lien upon any particular farm unit shall be released by the Secretary of the Interior after the total amount charged against such unit shall have been paid, and a recital of such lien shall be made in any instrument issued prior to such release by the said Secretary. The contracts executed by such district or districts shall recognize and acknowledge the existence of such lien: *Provided further*, That pending the issuance of public notice the construction assessment shall be at the same rate heretofore fixed by the Secretary of the Interior, but upon issuance of public notice the assessment rate shall be 2½ per centum per acre, payable annually, in addition to the net revenues derived from operations of the power plant as hereinbefore provided, of the total unpaid construction costs at the date of said public notice: *Provided further*, That the public notice above referred to shall be issued by the Secretary of the Interior upon completion of the construction of the power plant.] (*Acts Apr. 30, 1908, vol. 35, p. 83, sec. 1; May 18, 1916, vol. 39, p. 140, sec. 10; May 10, 1926, vol. 44, p. 464*)	$25,000.00	$575,000.00

[1] 1926 expenditures for enforcement of mineral leases; oil, gas, and oil-shale investigations and leasing and mining investigations in Alaska combined as appropriation items were combined in 1927 appropriation act.

During the fiscal year [1927] *1928* the head of any department or independent establishment of the Government having funds available for scientific and technical investigations and requiring cooperative work by the Geological Survey on scientific and technical investigations within the scope of the functions of that bureau and which it is unable to perform within the limits of its appropriations may, with the approval of the Secretary of the Interior, transfer to the Geological Survey such sums as may be necessary to carry on such investigations.
